RéSUMÉ

La GSHS du Sénégal 2005 est une enquête en milieu scolaire auprès des élèves de 6e secondaire, 5e secondaire, 4e secondaire et 3e secondaire.

Le but de cette enquête est de fournir des données sur les comportements de santé et les facteurs de prévention chez les élèves pour:

- Aider les pays à établir des priorités, à établir des programmes et à plaider en faveur de ressources pour les programmes et politiques de santé scolaire et de santé des jeunes;
- Permettre aux agences internationales, aux pays de faire des comparaisons entre les pays concernant la prévalence des comportements de santé et des facteurs de prévention; et
- Établir les tendances de la prévalence des comportements sanitaires et des facteurs de prévention par pays pour l'évaluation de la santé scolaire et la promotion de la santé des jeunes.

The 2005 Senegal GSHS was a school-based survey of students in Secondary 6, Secondary 5, Secondary 4, and Secondary 3.

The purpose of the GSHS is to provide data on health behaviors and protective factors among students to:

- Help countries develop priorities, establish programs, and advocate for resources for school health and youth health programs and policies;
- Allow international agencies, countries, and others to make comparisons across countries regarding the prevalence of health behaviors and protective factors; and
- Establish trends in the prevalence of health behaviors and protective factors by country for use in evaluation of school health and youth health promotion.

Echantillonnage

Méthode d'échantillonnage

The 2005 Senegal GSHS was a school-based survey of students in Secondary 6, Secondary 5, Secondary 4, and Secondary 3. A two-stage cluster sample design was used to produce data representative of all students in Secondary 6, Secondary 5, Secondary 4, and Secondary 3 in Senegal. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. A total of 3,154 students participated in the Senegal GSHS.

Taux de réponse

The school response rate was 100%, the student response rate was 60%, and the overall response rate was 60%.

Questionnaires

Aperçu

The GSHS uses a standardized scientific sample selection process; common school-based methodology; and core questionnaire modules, core-expanded questions, and country-specific questions that are combined to form a self-administered questionnaire that can be administered during one regular class period.

The 10 core questionnaire modules address the leading causes of morbidity and mortality among children and adults worldwide.

- Alcohol use
- Dietary behaviors
- Drug use
- Hygiene
- Mental health
- Physical activity
- Protective factors
- Sexual behaviors that contribute to HIV infection, other sexually-transmitted infections, and unintended pregnancy
- Tobacco use
- Violence and unintentional injury
